PROFESSIONAL SUMMARY

Computer Science undergraduate (Class of 2028) with hands-on experience building full-stack, AI-powered applications using RAG pipelines, LLM integration, and secure API architectures. Completed an intensive full-stack development internship and independently designed two end-to-end projects featuring OAuth 2.0 authentication, semantic search, and multi-LLM systems. Seeking Software Engineering / AI-ML internship opportunities.

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Java, C++, SQL

Backend & Frameworks: Django, FastAPI, Flask, React, PostgreSQL, Supabase, REST APIs, JWT

AI/ML: LLM Integration (GPT-4, Claude 3.5), RAG, ChromaDB, Prompt Engineering

Cloud & Tools: Google Cloud APIs, GitHub Actions, Vercel

EXPERIENCE

Python Full Stack Development Intern — EduSkill Foundation | [Offer Letter](#) | [Certificate](#) *Apr 2026 – Jun 2026*

- Completed an intensive 8-week full-stack development program, building end-to-end web applications with Django, JavaScript, jQuery, and SQL
- Developed responsive, multi-page web interfaces using HTML, CSS, and Bootstrap, integrated with Django backend services and SQL databases
- Collaborated using Git-based version control workflows, contributing to team-based feature development and code integration
- Applied full-stack engineering principles across front-end design, back-end logic, database management, and deployment

PROJECTS

AI Meeting Prep Agent (AURA)

FastAPI, React, PostgreSQL, Google APIs, OAuth 2.0, JWT | [GitHub](#)

- Built a full-stack system that generates meeting briefs by extracting and synthesizing data from Google Calendar events and Gmail conversations
- Implemented OAuth 2.0 and JWT-based authentication for secure, token-managed Google API integration
- Designed an LLM-powered RAG pipeline to summarize email threads and surface key meeting context automatically

LexiMind AI — Legal Intelligence Platform

React, FastAPI, ChromaDB, RAG, LLM's | [GitHub](#)

- Built a RAG-based contract analysis system using semantic search and ChromaDB vector storage for legal document retrieval
- Implemented a dual-retrieval architecture (BM25 + semantic search) with multi-LLM fallback to improve response reliability
- Integrated Tesseract OCR to enable processing and analysis of scanned legal documents

EDUCATION

B.Tech in Computer Science — [Inderprastha College of Engineering](#), AKTU University *2024 – 2028 (Expected)*

Senior Secondary (Class XII — Physics, Chemistry, Mathematics) — [Presentation Convent Senior Secondary School, Delhi](#) *2024*

HACKATHONS & ACHIEVEMENTS

- Top 10 Finalist, TechSprint Hackathon (GDG IPEC) — built Waste2Grow, an AI-powered waste management solution
- Kaggle Community Olympiad — built a lifestyle risk prediction model achieving 84.4% accuracy
- DevNovate GenIgnite Hackathon — developed Accessible AI, a platform designed for people with disabilities
- Hackathon Organizer, HackTheDen — coordinated event execution and participant engagement
